SUMMARY

A fresher Game Developer with a Bachelor's degree in Game Design and Development, seeking an entry-level role in the gaming industry. Passionate about advancing my skills, I specialize in game programming, level design, 2D/3D development, AR development and game testing, with experience in Unity and C++. I've participated in multiple game jams, where I honed my abilities in rapid prototyping, problem-solving, and team collaboration. As a motivated and enthusiastic fresher, I'm eager to bring my expertise and creativity to a dynamic team and contribute to crafting exceptional gaming experiences.

EXPERIENCE

Game Developer Intern **Jan 2026 - Present**
MetaShot, Kerala
Archfiend Studio, Kerala

- Implemented physics-based projectile throwing with trajectory prediction and validation.
- Built anticipation-driven AI fielding systems with dynamic agent selection.
- Designed context-aware character interactions using animation states and triggers.
- Developed predictive vs reactive gameplay logic using timing-based resolution.
- Implemented role-based AI decision systems for realistic multi-agent behavior.
- Maintained real-world scale accuracy and deterministic system resets.
- Built custom URP Shader Graphs for scale-independent surface detailing.
- Integrated AR Foundation with object detection, scan workflows, and AR placement.

AR/VR Developer Intern, Oqulix Pvt. Ltd, Kerala **Mar 2025 - Aug 2025**

- Developed AR prototypes using Vuforia with image tracking features in Unity.
- Implemented 3D object placement, animations, and UI interactions for AR apps.
- Created interactive AR experiences triggered by custom image targets.

COURSES & CERTIFICATIONS

Unreal Engine 5: C++ Developer - Udemy
C++ Programming - Udemy
Build Augmented Reality (AR) apps with Unity & Vuforia - Udemy
Unity C# Scripting: C# for Unity Game Development - Udemy

SKILLS

- Game Engine Proficiency (Unity & Unreal Engine)
- Programming Languages (C++, C#)
- Gameplay Systems & Mechanics
- Physics-Based Gameplay Programming
- AI Decision-Making & Player Interaction Systems
- Trajectory Prediction & Anticipation Systems
- Shader Graph Development (URP)
- Triplanar Mapping & World-Space Texturing
- AR Development with AR Foundation, Vuforia & Object Detection (Image Tracking)
- Technical Problem Solving & Debugging
- User Interface (UI) Design
- Communication and Interpersonal Skills
- Collaboration and Teamwork
- Adaptability and Continuous Learning

EDUCATION

Bachelor of Science in Game Design & Development **2022 - 2025**

- ICAT - Design and Media College, Bengaluru

Higher Secondary (10+2) **2008 - 2022**

- The Choice School, Ernakulam

LANGUAGES

English - Read, Write, Speak
Malayalam - Read, Write, Speak
French - Read, Write, Speak

HOBBIES

- Gaming
- Driving
- Motorcycle Riding
- Traveling
- Music
- Fitness
