SUMMARY

Software developer with a background in game development, application development, and AR/VR experiences. Experienced in developing interactive systems, debugging technical issues, implementing application logic, and integrating backend services. Knowledge of C#, C++, and Python, with hands-on experience using Unity and AWS technologies. Familiar with software testing, quality assurance, functional validation, and troubleshooting. Also have practical exposure to social media management, product promotion, and digital marketing through involvement with a boutique business. Interested in applying technical, analytical, and problem-solving skills across software development, QA testing, and technology-focused roles.

PROFESSIONAL EXPERIENCE

Game Developer Intern **Jan 2026 - April 2026**
MetaShot / Archfiend Studio, Kerala

- Developed Unity-based gameplay and application systems using C#, covering player movement, physics simulations, animation, and user interface functionality.
- Implemented a dual-player running system with movement logic, animation blending, and interaction handling, alongside AI-driven cricket fielding using interception logic and ball trajectory prediction.
- Built reusable UI components, including menus, loading screens, settings panels, and interactive carousels with swipe navigation, snapping, and looping.
- Optimized asset management and UI rendering using Sprite Atlas and Addressables to improve rendering efficiency.
- Integrated AWS API Gateway, Lambda, and DynamoDB to support multiplayer backend functionality, including heartbeat-based player tracking and disconnect detection.
- Implemented network connectivity monitoring to detect connection issues and developed custom Unity Editor tools using serialization and editor scripting.
- Created Shader Graph solutions using triplanar mapping to reduce texture stretching and integrated AR Foundation features for object detection, scanning, and AR placement.
- Debugged and validated gameplay, UI, physics, and networking systems to identify issues, verify fixes, and improve runtime reliability.

AR/VR Developer Intern **Mar 2025 - Aug 2025**
Oqulix Pvt. Ltd, Kerala

- Developed Unity AR prototypes using Vuforia image tracking, integrating 3D object placement, animations, and interactive UI.
- Tested and debugged image-triggered AR experiences to ensure reliable interactions between digital content and real-world environments.

SKILLS

Programming Languages & Web Technologies: C#, C++, Python, HTML, CSS

Software Development: Object-Oriented Programming, Application Logic, Debugging, Reusable System Design, Technical Problem-Solving

Software Testing & QA: Functional Testing, Gameplay Testing, Bug Identification, Issue Reproduction, Fix Validation

Game Development: Unity, Unreal Engine, Gameplay Mechanics, AI Systems, Physics-Based Programming, Animation Systems, UI Development

Development Tools & Version Control: Git, GitHub, Visual Studio Code, Unity Editor Scripting, Jira

Backend & Networking: AWS Lambda, API Gateway, DynamoDB, Client–Server Architecture, Multiplayer Networking, Connectivity Monitoring

UI/UX & Design Tools: Figma, Canva, Wireframing, UI Prototyping, Visual Content Design

AR/VR & Graphics: AR Foundation, Vuforia, NOX SDK, Image Tracking, Shader Graph, URP, Triplanar Mapping

Performance Optimization: Sprite Atlas, Addressables, Asset Management, Rendering Efficiency

Marketing & Social Media: Social Media Management, Product Descriptions, Promotional Copywriting, Brand Visual Identity

Professional Skills: Analytical Thinking, Problem-Solving, Communication, Attention to Detail, Teamwork, Adaptability, Time Management, Continuous Learning

---

EDUCATION

Bachelor of Science in Game Design & Development **2022 - 2025**

- ICAT - Design and Media College, Bengaluru

Higher Secondary (10+2) **2008 - 2022**

- The Choice School, Ernakulam

COURSES & CERTIFICATIONS

Unreal Engine 5: C++ Developer - Udemy
C++ Programming - Udemy
Build AR apps with Unity & Vuforia - Udemy
Unity C# Scripting: C# for Unity Game Development - Udemy

LANGUAGES

English - Read, Write, Speak
Malayalam - Read, Write, Speak
French - Read, Write, Speak
Hindi - Read, Write, Speak
