SUMMARY

A fresher Game Developer with a Bachelor's degree in Game Design and Development, seeking an entry-level role in the gaming industry. Passionate about improving my skills, I specialize in game programming, level design, 2D/3D development, AR development, and game testing, with experience in Unity and C++. I have completed an internship as a Game Developer, working on gameplay systems, UI development, multiplayer backend integration, and performance optimization. I've also participated in multiple game jams, strengthening my rapid prototyping, problem-solving, and teamwork skills. I am eager to contribute my creativity and technical expertise to a dynamic development team.

EXPERIENCE

Game Developer Intern **Jan 2026 - April 2026**
MetaShot, Kerala
Archfiend Studio, Kerala

- Developed multiple Unity-based gameplay systems including cricket mechanics, physics simulations, and UI frameworks.
- Designed and implemented a dual-player running system with realistic movement, animation blending, and interaction logic.
- Built advanced cricket fielding AI using interception-based logic for intelligent player positioning and ball tracking.
- Created physics-driven ball systems with trajectory prediction, damping calculations, and real-time landing validation.
- Implemented interactive UI systems including main menus, loading screens, settings panels, and reusable carousel components.
- Optimized UI performance using Sprite Atlas and Addressables to reduce draw calls and improve rendering efficiency.
- Developed smooth animation systems using Unity Animator with support for sprinting, diving, pivoting, and state transitions.
- Built a fully functional UI carousel with swipe navigation, snapping, infinite looping, and dynamic visual effects.
- Implemented real-time network monitoring system to detect connectivity status, latency, and unstable connections.
- Designed and integrated a server-authoritative multiplayer backend using AWS (API Gateway, Lambda, DynamoDB).
- Implemented heartbeat-based player tracking and automated disconnect detection using scheduled backend processes.
- Developed custom Unity Editor tools to persist Play Mode changes using serialization and editor scripting.
- Created Shader Graph solutions for advanced texture tiling using triplanar mapping to eliminate stretching issues.

- Integrated AR Foundation with object detection, scan workflows, and AR placement.
- Worked on reusable and scalable systems with a focus on performance, modularity, and real-time gameplay responsiveness.

AR/VR Developer Intern, Oqulix Pvt. Ltd, Kerala **Mar 2025 - Aug 2025**

- Developed AR prototypes using Vuforia with image tracking features in Unity.
- Implemented 3D object placement, animations, and UI interactions for AR apps.
- Created interactive AR experiences triggered by custom image targets.

SKILLS

- Game Engine Proficiency (Unity, Unreal Engine)
- Programming Languages (C++, C#)
- Gameplay Systems & Mechanics Development
- Physics-Based Gameplay Programming
- AI Systems & Player Interaction Design
- Trajectory Prediction & Anticipation Systems
- Multiplayer Systems & Networking
- Client–Server Architecture (Server-Authoritative Systems)
- Cloud Backend Development (AWS – Lambda, API Gateway, DynamoDB)
- Performance Optimization & Rendering Efficiency
- Animation Systems & State Machine Design (Unity Animator)
- Interception-Based AI & Decision Systems
- Shader Graph Development (URP)
- Advanced Texturing (Triplanar Mapping & World-Space Techniques)
- AR Development (AR Foundation, Vuforia, NOX, Object Detection)
- Custom Editor Tools & Editor Scripting (Unity)
- User Interface (UI) Systems & Design
- Technical Problem Solving & Debugging
- Communication & Interpersonal Skills
- Collaboration & Teamwork
- Adaptability & Continuous Learning

COURSES & CERTIFICATIONS

Unreal Engine 5: C++ Developer - Udemy
C++ Programming - Udemy
Build Augmented Reality (AR) apps with Unity & Vuforia - Udemy
Unity C# Scripting: C# for Unity Game Development - Udemy

EDUCATION

Bachelor of Science in Game Design & Development **2022 - 2025**

- ICAT - Design and Media College, Bengaluru

Higher Secondary (10+2) **2008 - 2022**

- The Choice School, Ernakulam

LANGUAGES

English - Read, Write, Speak
Malayalam - Read, Write, Speak
French - Read, Write, Speak

HOBBIES

- Gaming
- Driving
- Motorcycle Riding
- Traveling
- Music
- Fitness
